GVB Fixed line		Mokumflex DRT
30: 2 vans 31: 1 van		2 cars or vans
30/ 31: 6:00 - 24:00, Mo-Fr		6:00 - 24:00, Mo-Mo
30/31: 60min headway		N/A
30/31: 43 stops		301: 45 stops
0,155 €/ km		Free

60 min prior booking

15 min +- pick up

Lab Smart Public Transport

TU Delft

Impacts

Ridership and (estimated) costs

	Fixed, 30 + 31 Sprinter	DRT Combi
Mileage (vehicular km/ month)	27.561	4.098
Ridership (passengers/ month)	1.718	478
Vehicles	3	2
Operational costs (€/ month)	$44.288	$9.551
% vs Fixed line	100%	22%
Veh km/passenger	16.0	8.6

Lab Smart Public Transport

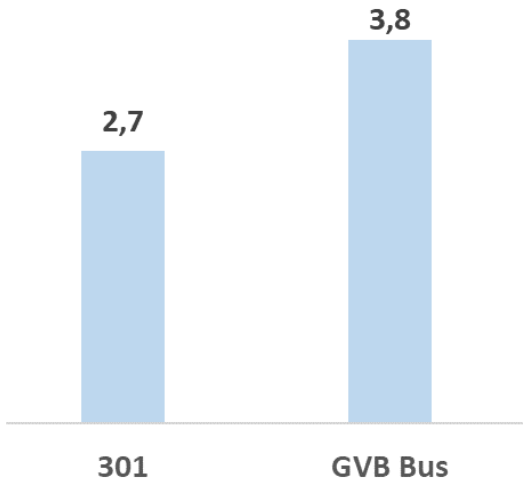
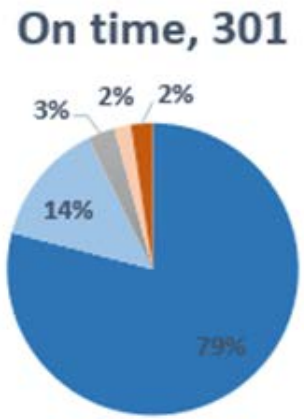
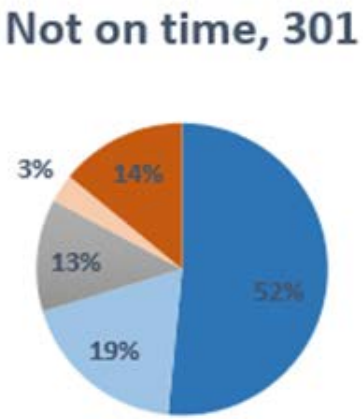
Lab Smart Public Transport

TU Delft

Population's and user perception







Very satisfied Satisfied Reasonable Dissatisfied Very dissatisfied

Smart Public Transport

TU Delft

Other impacts

	Fixed, 30 + 31 Sprinter	DRT Combi	DRT e-Crafter
CO2 emissions (kgCO2Eq/ month)	9.275	1.004	472

NB

- Noise
- Traffic safety
- Space occupation
- Etc.

Lab Smart Public Transport

TU Delft

Conclusion/discussion

- Evaluation of actual replacement of fixed transit by DRT
- Evaluation of wider impacts

- Ridership drop
- Efficiency increase -> costs and societal impacts

Failure or success?

Lessons learnt

- Not black and white results
- Supporting discussions of objectives
- DRT is more cost-efficient, but sufficiently?

Contribution to optimal mix?

- Modal shift?
- Social exclusion?

Discussion

- DRT specific vs. Specific operations?
- Sustainable business case? Rural vs Urban
- Is DRT suitable for dealing with (very) low demand?
